

UNS Tech Conductivity Meter

MADE IN CANADA

Better results, less work

FEATURES

- Pumps automate sample testing and rinsing
- Active feedback stabilizes sample temperature
- Data logging can record conductivity in real time

ADVANTAGES

- Automation saves time and costs while providing more accuracy
- Results highly reproducible independent of user (<0.3 % variation)
- True standard temperature measurement, always measure solutions at standard temperature, no need to estimate temperature correction

FEATURES

- Large, tablet interface
- Wireless communication with detector
- Easy to follow step-by-step instructions displayed
- USB port for simple data export

ADVANTAGES

- User friendly
- Easy to see and use touch screen display
- User multitasking, take the tablet and monitor the detector working remotely
